AI DV
DUAL CAMERA

Engineered for reconnaissance, surveillance, and precision field operations, the AI DV module integrates high-definition zoom and wide-angle imaging to deliver superior situational awareness with seamless perspective switching

AI-POWERED MULTI - MISSION
UAV SUITE

AI Dual Vision Model

A high-definition camera for detailed inspection and a wide-angle camera for expanded field coverage. This dual-view system provides superior situational awareness, seamless switching, and clear imaging for professional operations.

Mission Type: Reconnaissance, Surveillance & Precision Operations

Key Advantage: Dual-View Imaging with Instant Perspective Switching

● General Features

Camera Configuration	Dual Vision (Zoom + Wide-Angle)
Zoom Camera	High-Definition Optical System
Wide Camera	Expanded Field-of-View Lens
Image Processing	AI-Enhanced Real-Time Processing
Compatibility	Fully Compatible with All FPV Drone Models in Our Series
Latency	Low-Latency Live Output for FPV Control

Dual-Vision System
Wide & Precise
